1. Product Name

Grandfather Glow Clock

2. Product Code

22793

3. Colour

The plywood frame has a dark wood finish whilst the lights automatically cycle through various colours.

4. Brief Description

Classically styled with surprisingly contemporary benefits. With a large, traditional-looking and working clock for orientation. The column is attractively illuminated to provide relaxing and gentle light that softly changes colour and bathes the surrounding area in subtle hues.

5. Contents

- 1 x Grandfather Glow Clock

6. Snoezelen® Stimulations

- Sight

7. Best Use

Use indoors and either enjoy passively or with one of ROMPA®'s Wi Fi controllers for wireless interactivity. The Grandfather Glow Clock is especially effective when used with other items from the Multi-Purpose Reminiscence Furniture range (see below). This product is decorative and not intended to be handled.

• 20848, 21098 Sensory Magic®

9. Starting Up

- Insert a battery into the reverse of the clock face.
- Wall-mount.
- Plug in.

10. Detailed Description

Classically styled with surprisingly contemporary benefits. With a large, traditional-looking and working clock for orientation. The column is attractively illuminated to provide relaxing and gentle light that softly changes colour and bathes the surrounding area in subtle hues. Purposefully designed to exclude the weight, bulk and noisy chiming of the real thing, this stunning alternative intentionally includes soothing sensory features to captivate and comfort. Mains-powered.
Size: 58L x 60W x 200cmH

The LED light strip used in the Grandfather Glow Clock turns on automatically once plugged into the mains, automatically cycling through a rainbow of colours. The light strip is compatible with ROMPA® Wi Fi controllers and will change colour when a Wi Fi controller is in operation. When controlled in this way, the Wi Fi LED strip will change to the selected colour for one minute, before returning to automatic mode.

11. Safety

- **Always supervise the use of this product**

- This product weighs approximately 18kg – two people should take delivery of this product and install it.
- This product is decorative and not intended to be handled.
- A clear acrylic screen covers the clock face to ensure that the clock hands cannot be handled. The pendulum is a static illustration and does not function or move for safety reasons.
- For indoor use only, in a dry and clean environment.

12. Technical Specification

Size: 58L x 60W x 200cmH
Power: Consumption 24 watts
                 Input: 100-240v AC 50/60Hz 0.7A
                 Output: 12v DC 60W ma
Weight: approximately 18kg

13. <u>Installation</u>

1. Choose an appropriate location for the Grandfather Glow Clock, bearing in mind that:
   - It needs to be plugged in (one plug)
   - The glow effect will look most effective on a pale and uncluttered wall
   - The glow effect will be strongest in darker environments than in bright day light
   - The product weighs approximately 18kg – please choose a suitably flat and stable wall
   - Fixings are not included. Please purchase fixings that are appropriate to the construction of your wall.
2. Insert one AA battery into the reverse of the clock face. The battery holder is visible behind the clock face (it is not in a covered battery compartment). Make sure the clock is working before attaching the clock to the wall.
3. Wall-mount the Grandfather Glow Clock using appropriate fixings. It is advisable to use the mounting blocks located at the back of the product – two at the top and two at the bottom – and L brackets or mirror plates or similar.
4. Make sure the product has been securely attached to the wall.
5. Plug the product in. There is no ON/OFF switch – the product will light up automatically once plugged in. The light will change colour in sequence unless a ROMPA® wireless controller is used to choose a particular colour of light. The automatic colour light sequence will resume one minute after the ROMPA® wireless controller has been activated. The clock functions independently of the light, so the product could be unplugged for non-illuminated use.

14. <u>Care and Maintenance</u>

1. Replace the clock battery once the hands stop moving. The clock will need to be removed from the wall to access the battery holder.
2. Periodically dust the product with a soft and dry cloth.
3. To remove any dirt or more persistent marks, use a soft and very slightly dampened cloth. Avoid the use of any cleaning products, especially abrasive cleaning products, bleach or anti-bacterial sprays as these can damage varnished/lacquered surfaces.

15. <u>Troubleshooting</u>

Not applicable
